## HANCOCK MARIANA

Practical Speculation Andesite Press

The circulation of a mere rumor that the Morgan interests are accumulating Steel or that the Standard Oil crowd is getting out of St. Paul is sure at any time to create a market following. Most of the tips that are hawked about the Street are based on the supposition that somebody-or-other of consequence is buying or selling certain stocks. I do not know of a single case where anyone has been able to make money consistently by following information of this character, even when the information comes to him first hand. -from "A Speculative Decision" In 1917, an insider at a Wall Street brokerage firm took a close look at his company's most active traders and analyzed their trades to glean the secrets of their success... and what he found is still applicable today. Writing pseudonymously, he here offers a wide range of sage advice about: .buying on the way down .determining trends .how a bull market starts .the correct use of stop orders .when and what to sell short .and more.

**The A B C of Stock Speculation** Pickle Partners Publishing  
 Written by one of America's most colorful and flamboyant speculators, who made... and lost... four multi-million dollar fortunes. He was once blamed for causing the 1929 Crash, and for precipitating every market break from 1917 to 1940. This book is Livermore's legacy to the speculator for all time, in which he states his philosophy of trading and lays down the list of rules that are necessary to win at the speculative process. This valuable book by a Wall Street great is a collector's item.

*The Speculation Economy* St. Martin's Press  
 Rollo Tape (Richard D. Wyckoff) examines the intermediate and long swings of the stock market in this 1909-1911 sequel to "Studies in Tape Reading."The approach is based on the idea of interpreting the trend of the market by analyzing the action of prices obtained from a daily newspaper and recorded on charts. *Studies in Stock Speculation* contains 27 chapters in which Wyckoff describes how to analyze the market trend, interpret line and figure charts, rank and classify stocks, understand the logic of speculation, and select profitable investments. He also gives an overview of several general methods of trading, stages of the big swings, judging reactions, and more. Supplemental articles and graphs provide expanded breadth and detail for many topics of the main text. Some of the titles include: "A Method of Forecasting the Stock Market" (ranking stocks based on price and earnings);"A Specialist in Panics" and its sequel;"A Sign of Bull Moves";"A Stop Order Method" of mechanical trading;and "The Composite Man." 27 chapters, 13 additional articles, reader

inquiries, supplemental graphs of market averages and individual stocks, notes, a period glossary, and index.

*The Theory of Stock Exchange Speculation* Penguin  
 Jack Gillen is an astrologer and a genius, and considered by many to be a modern-day Nostradamus. In this revised and updated edition of *The Key to Speculation on the New York Stock Exchange*, he identifies the planetary cycles that drive the market. The result is on-target predictions in stock market trends. Backed by his many years of research, Jack presents a fascinating view of the New York Stock Exchange, panics and crashes, death and illness of world leaders, accidents and their effect on the Dow-Jones, and the year-end rally. He also outlines the astrological basics used in analyzing corporate charts and in making Dow-Jones predictions, and explains the importance of sensitive degrees of the Sun and Moon. All of this and more is explained in easily understood layman's terms, making this book an invaluable asset for anyone who wants to profit from the stock market. During his career as an astrologer, Jack Gillen has written 48 books and countless articles and other publications. He was the first to present computer software on a hand-held computer as a tool for seminars on horse and greyhound racing, sports, commodities, stocks and lotteries. He was the first to do a national television special, and had his own radio talk show, *AstroView*, on The Talk-America Radio Network. In the 21st century, his predictions continue to be as accurate as they were in the 20th century.

The ABC of Stock Speculation American Federation of Astr  
 The first book to reveal the deep historical roots of the modern corporate obsession with stock price - a major cause of recent scandals like those at Enron and WorldComDetails how the rise of

the modern corporation created the modern stock market - and why this led to an economy dominated by stock speculationAmerican companies once focused exclusively on providing the best products and services. But today, most corporations are obsessed with maximizing their stock prices, resulting in short-term thinking and the kind of cook-the-books corruption seen in the Enron and WorldCom scandals. How did this happen?In this groundbreaking book, Lawrence E. Mitchell traces the origins of the problem to the first decade of the 20th century, when industrialists and bankers began merging existing companies into huge "combines"- today's giant corporations - so they could profit by manufacturing and selling stock in these new entities. He describes and analyzes the legal changes that made this possible, the federal regulatory efforts that missed the significance of this transforming development, and the changes in American society and culture that led more and more Americans to enter the market, turning from relatively safe bonds to riskier common stock in the hopes of becoming rich. Financiers and the corporations they controlled encouraged this trend, but as stock ownership expanded and businesses were increasingly forced to cater to stockholders' "get rich quick" expectations, a subtle but revolutionary shift in the nature of the American economy occurred: finance no longer served industry; instead, industry began to serve finance.The *Speculation Economy* analyzes the history behind the opening of this economic Pandora's box, the root cause of so many modern acts of corporate malfeasance. The Key to Speculation on the New York Stock Exchange Scholar's Choice

Successful Stock Market Speculation : a Speculator's Manual Pickle Partners Publishing  
 Interdisciplinary in design and concept, *Speculation, Now*

illuminates unexpected convergences between images, concepts, and language. Artwork is interspersed among essays that approach speculation and progressive change from surprising perspectives. A radical cartographer asks whether "the speculative" can be represented on a map. An ethnographer investigates religious possession in Islam to contemplate states between the divine and the seemingly human. A financial technologist queries understandings of speculation in financial markets. A multimedia artist and activist considers the relation between social change and assumptions about the conditions to be changed, and an architect posits purposeful neglect as political strategy. The book includes an extensive glossary with more than twenty short entries in which scholars contemplate such speculation-related notions as insurance, hallucination, prophecy, the paradox of beginnings, and states of half-knowledge. The book's artful, nonlinear design mirrors and reinforces the notion of contingency that animates it. By embracing speculation substantively, stylistically, seriously, and playfully, *Speculation, Now* reveals its subversive and critical potential. Artists and essayists include William Darity Jr., Filip De Boeck, Boris Groys, Hans Haacke, Darrick Hamilton, Laura Kurgan, Lin + Lam, Gary Lincoff, Lize Mogel, Christina Moon, Stefania Pandolfo, Satya Pemmaraju, Mary Poovey, Walid Raad, Sherene Schostak, Robert Sember, and Srdjan Jovanovic Weiss. Published by Duke University Press and the Vera List Center for Art and Politics at The New School

#### **The Art Of Speculation** Scholar's Choice

The follow-up to Victor Niederhoffer's critically and commercially acclaimed book *The Education of a Speculator* has finally arrived. Practical Speculation continues the story of a true market legend who ran a hugely successful futures trading firm that had annual returns of over thirty percent until unforeseen losses forced him to close operations. Like a phoenix rising from the ashes, Niederhoffer returned to the world of trading stocks, futures, and options, with a new colleague and a new approach and found success. Order your copy of this compelling story of risk and survival today.

[The Abc of Stock Speculation... - Primary Source Edition](#) Forgotten Books

A lively, original, and challenging history of stock market speculation from the 17th century to present day. Is your investment in that new Internet stock a sign of stock market savvy or an act of peculiarly American speculative folly? How has the psychology of investing changed—and not changed—over the last five hundred years? In *Devil Take the Hindmost*, Edward Chancellor traces the origins of the speculative spirit back to ancient Rome and chronicles its revival in the modern world: from the tulip scandal of 1630s Holland, to "stockjobbing" in London's Exchange Alley, to the infamous South Sea Bubble of 1720, which prompted Sir Isaac Newton to comment, "I can calculate the motion of heavenly bodies, but not the madness of people." Here are brokers underwriting risks that included highway robbery and the "assurance of female chastity"; credit notes and lottery tickets circulating as money; wise and unwise investors from Alexander Pope and Benjamin Disraeli to Ivan Boesky and Hillary Rodham Clinton. From the Gilded Age to the Roaring Twenties, from the nineteenth century railway mania to the crash of 1929, from junk bonds and the Japanese bubble economy to the day-traders of the Information Era, *Devil Take the Hindmost* tells a fascinating story of human dreams and folly through the ages. *Studies in Stock Speculation* Duke University Press  
Recommended Reading by Warren Buffet in his March 2013 Letter to Shareholders How speculation has come to dominate investment—a hard-hitting look from the creator of the first index fund. Over the course of his sixty-year career in the mutual fund industry, Vanguard Group founder John C. Bogle has witnessed a massive shift in the culture of the financial sector. The prudent, value-adding culture of long-term investment has been crowded out by an aggressive, value-destroying culture of short-term

speculation. Mr. Bogle has not been merely an eye-witness to these changes, but one of the financial sector's most active participants. In *The Clash of the Cultures*, he urges a return to the common sense principles of long-term investing. Provocative and refreshingly candid, this book discusses Mr. Bogle's views on the changing culture in the mutual fund industry, how speculation has invaded our national retirement system, the failure of our institutional money managers to effectively participate in corporate governance, and the need for a federal standard of fiduciary duty. Mr. Bogle recounts the history of the index mutual fund, how he created it, and how exchange-traded index funds have altered its original concept of long-term investing. He also presents a first-hand history of Wellington Fund, a real-world case study on the success of investment and the failure of speculation. The book concludes with ten simple rules that will help investors meet their financial goals. Here, he presents a common sense strategy that "may not be the best strategy ever devised. But the number of strategies that are worse is infinite." *The Clash of the Cultures: Investment vs. Speculation* completes the trilogy of best-selling books, beginning with *Bogle on Investing: The First 50 Years* (2001) and *Don't Count on It!* (2011)

Excerpt from *The A B C of Wall Street* there were many requests for a book dealing with the principles governing stock speculation. If there is one man better qualified than another to produce such a book that man is Mr. Charles H. Dow. Several attempts were made to have him write the desired volume but they were unavailing. From time to time in his Wall Street career, extending over a quarter of a century, Mr. Dow has carefully evolved his theories of successful stock speculation. They are to be found in Chapters IV to XX, inclusive, and can be commended to any one interested in stock speculation as remarkable for their grasp of a subject about which so little has been written and so much misinformation is gratuitously offered the public. In the preparation of this little volume thanks are also due to the Wall Street Journal, the Evening Post, the Dow, Jones & Co.'s News Agency, Mr. Alexander Dana Noyes, Mr. Daniel Kellogg, Mr. E. W. Harden, and a number of brokers and speculators. The reader of course understands that there is no royal road to success in speculation. It would be fallacy to undertake to show how money can be made. No infallible plan has yet been discovered. Experience and observation when intelligent, however, are valuable, and we are of the 1 opinion that the average speculator will find a study of the following pages to be useful and profitable. In this 1931 Wall Street classic, author and noted economist Humphrey B. Neill explains not only how to read the tape, but also how to figure out what's going on behind the numbers. Illustrated throughout with graphs and charts, this book contains excellent sections on human nature and speculation and remains a classic text in the field today.

[Speculation on the Stock and Produce Exchanges of the United States](#) John Wiley & Sons

This book is the first that describes the practices of any stock exchange; it makes evident a high development of practices, with puts, calls, pools, and manipulations; and it appeared as early as the seventeenth century. Not inappropriately the stock exchange described is that of Amsterdam, a city which at the date of the volume's publication —1688 — was still the leading financial center of the world. The book, to be sure, is hardly a systematic account of the institution; the author pursued moral, philosophical, and rhetorical objectives, and, while saying a lot that seems now to be of little value, manages somehow to leave unsaid a great deal that would be of interest for us. Nevertheless, it represents, even in its peculiar form, a really important source of information about the stock exchange, and indeed about the Dutch business world of that period.

One of BuzzFeed's 24 Best Fiction Books of 2015 "As Simon, a lonely research librarian, searches frantically for the key to a curse that might be killing the women in his family, he learns strange and fascinating secrets about their past. A tale full of magic and family mystery, *The Book of Speculation* will keep you up all night reading."—Isaac Fitzgerald, BuzzFeed Simon Watson, a young librarian, lives alone in a house that is slowly crumbling toward the Long Island Sound. His parents are long dead. His mother, a circus mermaid who made her living by holding her breath, drowned in the very water his house overlooks. His younger sister, Enola, ran off six years ago and now reads tarot cards for a traveling carnival. One June day, an old book arrives on Simon's doorstep, sent by an antiquarian bookseller who purchased it on speculation. Fragile and water damaged, the book is a log from the owner of a traveling carnival in the 1700s, who reports strange and magical things, including the drowning death of a circus mermaid. Since then, generations of "mermaids" in Simon's family have drowned—always on July 24, which is only weeks away. As his friend Alice looks on with alarm, Simon becomes increasingly worried about his sister. Could there be a curse on Simon's family? What does it have to do with the book, and can he get to the heart of the mystery in time to save Enola? In the tradition of Sara Gruen's *Water for Elephants*, Erin Morgenstern's *The Night Circus*, and Elizabeth Kostova's *The Historian*, *The Book of Speculation*—with two-color illustrations by the author—is Erika Swyler's moving debut novel about the power of books, family, and magic.

Philip L. Carret (1896-1998) was a famed investor and founder of The Pioneer Fund (Fidelity Mutual Trust), one of the first Mutual Funds in the United States. A former Barron's reporter and WWI aviator, Carret launched the Mutual Trust in 1928 after managing money for his friends and family. The initial effort evolved into Pioneer Investments. He ran the fund for 55 years, during which an investment of \$10,000 became \$8 million. Warren Buffett said of him that he had "the best long term investment record of anyone I know" He is most famous for the long successful track record he achieved investing in Common Stocks and for being one of Warren Buffett's role models. This book comprises a series of articles written for Barron's and published in book form in 1930.—Print Ed.
