*Fiske Countdown to College* The Rosen Publishing Group, Inc  
The outbreak of the First World War was 'a drama never surpassed'. One hundred years later, the characters still seem larger than life: Archduke Franz Ferdinand, brooding heir to the Habsburg throne; the fanatical Bosnian Serb assassins who plot to murder him; Conrad and Berchtold, the Austrians who exploit the outrage; Kaiser Wilhelm and Bethmann Hollweg, backing up the Austrians; Sazonov, Russian Foreign Minister, trying to live down a reputation for cowardice; Poincaré and Paléologue, two French statesmen who urge on the Russians; and not least Winston Churchill, who, alone among Cabinet officials in London, perceives the seriousness of the situation in time to take action. July 1914 tells the story of Europe's countdown to war through the eyes of these men, between the bloody opening act on 28 June 1914 and Britain's final plunge on 4 August, which turned a European conflict into a world war. The outbreak of war was no accident of fate. Individual statesmen, pursuing real objectives, conjured up the conflict - in some cases by conscious intention. While some sought honourably to defuse tensions, others all but oozed with malice as they rigged the decks for war. Dramatic, inevitably tense and almost forensically observed, Sean McMeekin's unique book retells the story of that cataclysmic month, making clear as never before who was responsible for the catastrophe. You will never think the same way again about the origins of the First World War.

From the acclaimed author of *How to Love* comes another stunning contemporary novel, perfect for fans of Sarah Dessen. Molly Barlow is facing one long, hot summer—99 days—with the boy whose heart she broke and the boy she broke it for . . . his brother. Day 1: Julia Donnelly eggs my house my first night back in Star Lake, and that's how I know everyone still remembers everything. She has every right to hate me, of course: I broke Patrick Donnelly's heart the night everything happened with his brother, Gabe. Now I'm serving out my summer like a jail sentence: just ninety-nine days till I can leave for college and be done. Day 4: A nasty note on my windshield makes it clear Julia isn't finished. I'm expecting a fight when someone taps me on the shoulder, but it's just Gabe, home from college and actually happy to see me. "For what it's worth, Molly Barlow," he says, "I'm really glad you're back." Day 12: Gabe wouldn't quit till he got me to come to this party, and I'm surprised to find I'm actually having fun. I think he's about to kiss me—and that's when I see Patrick. My Patrick, who's supposed to be clear across the country. My Patrick, who's never going to forgive me.

Read award-winning journalist Frank Bruni's New York Times bestseller: an inspiring manifesto about everything wrong with today's frenzied college admissions process and how to make the most of your college years. Over the last few decades, Americans have turned college admissions into a terrifying and occasionally devastating process, preceded by test prep, tutors, all sorts of stratagems, all kinds of rankings, and a conviction among too many young people that their futures will be determined and their worth established by which schools say yes and which say no. In *Where You Go is Not Who You'll Be*, Frank Bruni explains why this mindset is wrong, giving students and their parents a new

perspective on this brutal, deeply flawed competition and a path out of the anxiety that it provokes. Bruni, a bestselling author and a columnist for the New York Times, shows that the Ivy League has no monopoly on corner offices, governors' mansions, or the most prestigious academic and scientific grants. Through statistics, surveys, and the stories of hugely successful people, he demonstrates that many kinds of colleges serve as ideal springboards. And he illuminates how to make the most of them. What matters in the end are students' efforts in and out of the classroom, not the name on their diploma. Where you go isn't who you'll be. Americans need to hear that--and this indispensable manifesto says it with eloquence and respect for the real promise of higher education.

A top cybersecurity journalist tells the story behind the virus that sabotaged Iran's nuclear efforts and shows how its existence has ushered in a new age of warfare—one in which a digital attack can have the same destructive capability as a megaton bomb.

"Immensely enjoyable . . . Zetter turns a complicated and technical cyber story into an engrossing whodunit."—The Washington Post The virus now known as Stuxnet was unlike any

other piece of malware built before: Rather than simply hijacking targeted computers or stealing information from them, it proved that a piece of code could escape the digital realm and wreak actual, physical destruction—in this case, on an Iranian nuclear facility. In these pages, journalist Kim Zetter tells the whole story behind the world's first cyberweapon, covering its genesis in the corridors of the White House and its effects in Iran—and telling the spectacular, unlikely tale of the security geeks who managed to unravel a top secret sabotage campaign years in the making. But Countdown to Zero Day also ranges beyond Stuxnet itself, exploring the history of cyberwarfare and its future, showing us what might happen should our infrastructure be targeted by a Stuxnet-style attack, and ultimately, providing a portrait of a world at the edge of a new kind of war.
