### **KENDAL RANDALL**

---

Decisions and Orders of the National Labor Relations Board Springer Publishing Company

The first textbook devoted to this emerging area, Health Systems Science now brings you fully up to date with today's key issues and solutions. This increasingly important branch of health care explores how health care is delivered, how health care professionals work together to deliver that care, and how the health system can improve patient care and health care delivery. Along with basic and clinical sciences, health systems science is rapidly becoming a crucial 'third pillar' of medical science, with an emphasis on understanding the role of human factors, systems engineering,

leadership, and patient improvement strategies that will help transform the future of health care and ensure greater patient safety. In this 2nd Edition, new chapters, new exercises, and new information help you acquire the knowledge and skills you need for success in today's challenging healthcare system. The first comprehensive text for mastering health systems science, offering practical coverage of all of the factors in the lives of patients that influence their well-being, the structures and processes of the health system itself, societal factors, communication, and information technology. NEW to this edition: New content on systems thinking, ethics and legal issues, and international care models further define and address this new important component of health care education; additional exercises; and expanded information on the patient

experience and private practice. Complete coverage of patient safety, quality improvement, value in health care, teamwork, stewardship of health care resources, population health, clinical informatics, care coordination, leadership, and health care financing/reform. Patient improvement strategies incorporate checklists, information technology, team training, and more. A consistent chapter template provides clear coverage of each topic, including Learning Objectives, Chapter Outline, Core Chapter Content, Summary, Questions for Reflection, and Annotated Bibliography and References. Developed by the American Medical Association's Accelerating Change in Medical Education Consortium, and authored by a team that includes AMA staff members working with individuals from the Consortium member schools. [Congressional Record](#) Anchor Canada

Aviation plays vital roles in commerce, defense, science and leisure travel. Irrespective of the purpose of flight, crew and passengers are challenged by exposure to a variety of environmental conditions that can differ widely from work and travel environments on the surface of the Earth. With anticipated changes in aviation and space technology, new challenges to health and safety of crew and passengers can be expected. In this Research Topic, we welcome contributions from those whose work and interests are relevant to the health and safety of crew and passengers. This includes, but is not limited to, health and safety professionals, FAA examiners, corporate medical officers, aerospace and occupational physicians, physiologists, military and scientific team members, public health professionals, as well as engineers who are tasked with crew and passenger health and safety design projects. While 4.1 billion passengers fly on commercial airlines annually (and this figure is even higher when taking into account privately owned aircraft and military flight), for the most part aviation is safe. Passengers do arrive at their destinations with little concern to their own well-being and flight is generally well tolerated. However, older flyers, people with (diagnosed or undiagnosed) preexisting disease, and other vulnerable passengers (such as young children and pregnant women) may be at risk of complications and crew may be at special risk due to the frequency and duration of their many flight-related exposures. Health and safety issues for crew and passengers include but are not limited to: potentially severe circadian rhythm disruption, potential health effects of low-level cosmic ionizing radiation exposure at altitude, reduced oxygen delivery and tissue hypoxia at cabin pressurization, cabin air contamination by engine gases, toxic materials used in uniforms and some cabin seat materials, occupational noise, pesticides used for cabin disinsection, lack of adequate crew rest on layovers or between flights, cardiovascular demands of flight and effects of flight-related dehydration, the current absence of screening protocols especially in the context of a rising number of elderly and vulnerable flyers, lack of healthy nutrition at airports and in flight, availability of food and hydration as well as adequate cabin temperature under delay conditions, effects of alcohol use on flight-related physiological and behavioral health risks, anxiety and psychological distress associated with air travel, the effects of long-haul or ultra-long-haul flights on thromboembolic events as well as smoking

cessation efforts and related psychological outcomes, job-related stress and harassment among crew. Cosmic ionizing and non-ionizing radiation exposure have drawn attention as have historic exposures of crew and passengers to second-hand cigarette smoke. The threat of political and interpersonal violence and altercations involving aviation cannot be overlooked. On-board medical emergencies run a wide gamut and the capacity to respond becomes more problematic as the duration of flights becomes longer or in the case of flight over oceans and the poles. In addition, in-flight and post flight embolisms and myocardial infarctions are more prevalent than might be expected. We hence encourage manuscripts that address in-flight medical response, including the capabilities on different types of aircraft on potential interventions by crew and medical volunteers. In addition, aviation as a vector for the carriage of disease is a significant concern to public health and security of populations world-wide, and we welcome submissions regarding infectious disease epidemiology and medicine as it relates to air travel. Insects and occasional unplanned travel by birds and rodents can present additional public health concerns. We are approaching an era where space travel may soon be increasingly common. Future flights for near-Earth orbit by leisure travelers and as well as travel to the moon and Mars raise a host of new questions with health and safety implications. What are the proposed health and safety accommodations going to be? Who will be allowed to travel? Perhaps the most interesting question is - who will make the rules?

#### Give and Take Prometheus Books

This Revised Reprint of our 8th edition, the "gold standard" in community health nursing, *Public Health Nursing: Population-Centered Health Care in the Community*, has been updated with a new Quality and Safety Education in Nursing (QSEN) appendix that features examples of incorporating knowledge, skills, and attitudes to improve quality and safety in community/public health nursing practice. As with the previous version, this text provides comprehensive and up-to-date content to keep you at the forefront of the ever-changing community health climate and prepare you for an effective nursing career. In addition to concepts and interventions for individuals, families, and communities, this text also incorporates real-life applications of the public nurse's role, Healthy People 2020 initiatives, new chapters on forensics and genomics, plus timely coverage of disaster management

and important client populations such as pregnant teens, the homeless, immigrants, and more. Evidence-Based Practice boxes illustrate how the latest research findings apply to public/community health nursing. Separate chapters on disease outbreak investigation and disaster management describe the nurse's role in surveilling public health and managing these types of threats to public health. Separate unit on the public/community health nurse's role describes the different functions of the public/community health nurse within the community. Levels of Prevention boxes show how community/public health nurses deliver health care interventions at the primary, secondary, and tertiary levels of prevention. What Do You Think?, Did You Know?, and How To? boxes use practical examples and critical thinking exercises to illustrate chapter content. The Cutting Edge highlights significant issues and new approaches to community-oriented nursing practice. Practice Application provides case studies with critical thinking questions. Separate chapters on community health initiatives thoroughly describe different approaches to promoting health among populations. Appendixes offer additional resources and key information, such as screening and assessment tools and clinical practice guidelines. NEW! Quality and Safety Education in Nursing (QSEN) appendix features examples of incorporating knowledge, skills, and attitudes to improve quality and safety in community/public health nursing practice. NEW! Linking Content to Practice boxes provide real-life applications for chapter content. NEW! Healthy People 2020 feature boxes highlight the goals and objectives for promoting health and wellness over the next decade. NEW! Forensic Nursing in the Community chapter focuses on the unique role of forensic nurses in public health and safety, interpersonal violence, mass violence, and disasters. NEW! Genomics in Public Health Nursing chapter includes a history of genetics and genomics and their impact on public/community health nursing care.

#### **The Engaged Health Sciences Library Liaison** Taylor & Francis

Contains a Nurse's Pocket Minder, which lists nursing diagnoses through the latest NANDA Conference. Make sure your students use the best pocket guide to plan patient care! This handy pocket guide helps nursing students identify interventions most commonly associated with nursing diagnoses when caring for patients. It's the perfect resource for hospital and community-based settings.

**Revolution with a Human Face** Jones & Bartlett Publishers

Very Short Introductions: Brilliant, Sharp, Inspiring The British constitution is regarded as unique among the constitutions of the world. What are the main characteristics of Britain's peculiar constitutional arrangements? How has the British constitution altered in response to the changing nature of its state - from England, to Britain, to the United Kingdom? What impact has the UK's developing relations with the European Union caused? These are some of the questions that Martin Loughlin addresses in this Very Short Introduction. As a constitution, it is one that has grown organically in response to changes in the economic, political, and social environment, and which is not contained in a single authoritative text. By considering the nature and authority of the current British constitution, and placing it in the context of others, Loughlin considers how the traditional idea of a constitution came to be retained, what problems have been generated as a result of adapting a traditional approach in a modern political world, looking at what the future prospects for the British constitution are. In this new edition of the Very Short Introduction, Loughlin includes a discussion of the impact of developments over the decade since its first publication, examining Brexit, the Scottish independence referendum of 2014, and the settlement in Northern Ireland. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

**Trade Union Strategies against Healthcare Marketization** Rowman & Littlefield Publishers

With the advent of health care reform and an emphasis on reducing health care costs, health promotion and disease prevention is a priority in nursing care. Be prepared with *Health Promotion Throughout the Life Span*, 8th Edition, your comprehensive guide to major health promotion concepts. Featuring practical guidance - including boxes on diversity awareness, evidence-based practice, innovative practice, hot topics, and quality and safety as well as case studies and care plans - our experienced authors give you all the tools you need to stay current on the latest research and trends in health promotion. Extensive coverage of growth

and development throughout the lifespan emphasizes the unique problems and health promotion needs of each age and stage of development. Separate chapters on each population - group, individual, family, and community - stress the unique issues faced when providing care to each group. Evidence-Based Practice boxes emphasize current research efforts and opportunities in health promotion. Hot Topics and Innovative Practice boxes engage students' interest by introducing significant issues, trends, and creative programs and projects in health promotion practice. Diversity Awareness boxes address various cultural perspectives and provide important information that needs to be considered in planning care. Case studies and care plans present realistic situations that challenge students to reflect upon important health promotion concepts. Think About It boxes dig deeper into the chapter topic and encourage critical thinking. Numerous pedagogical features such as objectives, key terms, and textual summaries highlight the most important concepts and terms in each chapter. Updated nutrition coverage includes MyPyramid from the FDA, as well as the latest information on food safety and fad diets. Expanded health policy coverage focuses on global health, historical perspectives, financing healthcare, concierge medical practices, and the hospitalist movement. *Health Promotion for the Twenty-First Century* explores current and future health promotion challenges and research initiatives. Updated Healthy People 2010 data includes midcourse review objectives and an introduction to Healthy People 2020. Case Studies and Care Plans summarize key concepts and show how they apply to real-life practice.

**Aerospace Health and Safety: Today and the Future** Elsevier Health Sciences Praise for the First Edition: "[O]ffers advice on everything from organizing the clinical experience to understanding the legal issues of clinical education....The authors have 32 years of combined teaching experience and are able to offer quality, real life, clear instructions and advice in an easy-to-read book that easily slips into a lab coat pocket for a ready reference. This is a must have for the new clinical instructor as well as a concise reference for those who have been in the trenches but could use some streamlining to their teaching methods."--Nursing Education Perspectives This new edition of the popular *iFast Facts* guide to nursing education continues to provide a wealth of pragmatic information about preparing nurses to become top-notch clinical

instructors. Using real-life experiences, the guide follows the instructor from day one through clinical assignments to complete an entire rotation. Substantially revised, it includes: Two new chapters: The role of simulation in clinical learning Sample letters of reference and how to obtain them New or revised information: Case studies of negative experiences that illustrate what not to do as a clinical instructor New examples of online modules Changes in accreditation requirements How to foster student accountability Preparing for your clinical teaching assignment How to organize your semester regarding goals, communication with students, establishing student expectations, and more Changes in student and teacher liability How to identify and help weak students How to deal with punctuality and absences Safety concerns The book describes policies and procedures with which instructors must be familiar, and reviews legal issues including confidentiality and patient privacy. Proper documentation and student evaluations are discussed as well as how to conduct student clinical conferences. Also covered are ways to make efficient use of onsite personnel and the instructor's responsibility regarding NCLEX preparation. This is a valuable resource for nurses who are beginning their professional teaching careers and for seasoned faculty trying to optimize the learning experience for their students. [Alternative Healthcare](#) Elsevier Health Sciences

Marketization in the healthcare sector affects the quality and delivery of care, as well as healthcare workers' working conditions. Based on a comparison of England and Germany, along with an in-depth case study looking at New York, USA, this volume examines how trade unions respond to marketization processes and the determinants of successful strategies. The author draws on a rich empirical study to develop a theoretical framework that accounts for sector-specific opportunity structures stemming from marketization processes and on the relevant unions' local-level leeway that opens if they build up and mobilise the available resources and capacities. The book identifies determinants of successful trade union strategies, explains the puzzling observation of similar strategic choices across different systems, and draws conclusions for prospects of trade unionism in the marketized healthcare sector. This book emphasizes the transformative effect of marketization on healthcare and the opportunities this change creates for unions, while giving

special attention to the local-level conditions of trade unionism in the analysis of conflicts evolving around marketization in the hospital sector. It is of interest to academics and practitioners working in healthcare management, human resource management, and employment relations.

*Tales from Kentucky Nurses* F A Davis Company

In this social and cultural history of Czechoslovakia's "gentle revolution," James Krapfl shifts the focus away from elites to ordinary citizens who endeavored—from the outbreak of revolution in 1989 to the demise of the Czechoslovak federation in 1992—to establish a new, democratic political culture. Unique in its balanced coverage of developments in both Czech and Slovak lands, including the Hungarian minority of southern Slovakia, this book looks beyond Prague and Bratislava to collective action in small towns, provincial factories, and collective farms. Through his broad and deep analysis of workers' declarations, student bulletins, newspapers, film footage, and the proceedings of local administrative bodies, Krapfl contends that Czechoslovaks rejected Communism not because it was socialist, but because it was arbitrarily bureaucratic and inhumane. The restoration of a basic "humanness"—in politics and in daily relations among citizens—was the central goal of the revolution. In the strikes and demonstrations that began in the last weeks of 1989, Krapfl argues, citizens forged new symbols and a new symbolic system to reflect the humane, democratic, and nonviolent community they sought to create. Tracing the course of the revolution from early, idealistic euphoria through turns to radicalism and ultimately subversive reaction, *Revolution with a Human Face* finds in Czechoslovakia's experiences lessons of both inspiration and caution for people in other countries striving to democratize their governments.

*Reflective Practice in Nursing* Elsevier Health Sciences

Now in its Fifth Edition, *Nurse Practitioner's Business Practice and Legal Guide* continues to provide a solid foundation for students and practicing nurses to build confident and effective practices. A must-have resource for every new or current nurse practitioner (NP), it defines what an NP is and does while explaining the legal scope with specific state and federal regulations. Completely updated and revised with essential state-by-state appendices, *Nurse Practitioner's Business Practice and Legal Guide*, Fifth Edition offers expert insights on

prescribing, hospital privileges, negligence and malpractice, risk management, health policy, ethics, and measuring NP performance.

*Foundations of Clinical Nurse Specialist Practice, Second Edition* Springer Publishing Company

The appearance of The Black Flyer, a television super hero, shakes up the city of Green Haven. A group of role playing gamers wonders why the police and the army are apparently helpless against this super hero who doesn't act like the TV original and decide to take him on themselves.

*The Great Indoors* Elsevier Health Sciences Advanced Practice Palliative Nursing is the first text devoted to advanced practice nursing care of the seriously ill and dying. This comprehensive work addresses all aspects of palliative care including physical, psychological, social, and spiritual needs. Chapters include: symptoms common in serious illness, pediatric palliative care, spiritual and existential issues, issues around the role and function of the advanced practice nurse (APN), reimbursement, and nursing leadership on palliative care teams. Each chapter contains case examples and a strong evidence base to support the highest quality of care. The text is written by leaders in the field and includes authors who have pioneered the role of the advanced practice nurse in palliative care. This volume offers advanced practice content and practical resources for clinical practice across all settings of care and encompassing all ages, from pediatrics to geriatrics.

*Research for Advanced Practice Nurses, Second Edition* Springer Publishing Company

This highly anticipated, fully revised second edition revisits and augments the award-winning *Creating & Sustaining Civility in Nursing Education*. In this comprehensive new edition, author Cynthia Clark explores the problem of incivility within nursing academe and provides practical solutions that range from ready-to-use teaching tools to principles for broad-based institutional change. She further explores the costs and consequences of incivility, its link to stress, ways to identify the problem, and how to craft a vision for change – including bridging the gap between nursing education and practice. Rather than dwell on the negative, this book focuses on solutions, including role-modeling and mentoring, stress management, and positive learning environments. Nurse educators at all levels will appreciate the variety of evidence-based strategies that

faculty – and students – can implement to promote and maintain civility and respect in the education setting, including online learning.

**Green Haven** Xlibris Corporation

*Immigrant among Thorns* The first complete intimate story of a struggling woman walks out of poverty into the Promised Land with courage strength and triumph. This beloved writer is an Immigrant among Thorns-Catherine Gray Taylor.

Scientific American / Farrar, Straus and Giroux

This volume is an empirical assessment of an often-neglected space in migration research – social, psychological and human costs for both migrants and the families they leave behind – based on qualitative and quantitative research findings. Globally, the focus of migration research has consisted of the intersections of migration and remittances. This overemphasis on remittances obscures the contributions and sacrifices made by migrants and their families. With this backdrop in view, *India Migration Report 2013* documents issues such as:

- Children's negotiation of parental migration
- Coping mechanisms adopted by women left behind
- Utilization of social networks by the elderly during a health crisis
- Demographic implications of migration
- Household management and child care by spouses of migrant nurses
- Lifestyle management by the elderly, who migrate with their children, in the absence of other traditional and familiar kinship structures
- Transition costs involved in peasant migration
- Social costs of migration in the case of emigration to the Gulf region
- Broader impacts of migration on the family

In addition, the book also includes articles dealing with nurses' migration, skilled mobility, informalization of labour markets, mobility of women workers, global financial crisis and return migration, remittances management and a critical assessment of bilateral mobility agreements among nations to protect Indian workers. It will be of interest to those in migration studies, sociology, law, economics, gender studies, diaspora studies, international relations and demography, apart from non-governmental organizations, policy-makers and governmental institutions working in the field of migration.

**The Every-Other-Day Diet** Routledge

Targeting the complex set of stressors found in health care work environments, this unique, practical resource describes the impact of bullying, harassment, addictions, violence and other triggers and the resulting adverse physiological and

behavioral responses in these facilities.  
*Don Cherry's Sports Heroes* Elsevier Health Sciences

"The Every-Other-Day Diet is the perfect diet for me." That's the satisfied declaration of a dieter who lost 41 pounds on the Every-Other-Day Diet. (And kept it off!) You too can expect dramatic results with this revolutionary approach to weight loss that is incredibly simple, easy, and effective. Created by Dr. Krista Varady, an associate professor of nutrition at the University of Illinois, the Every-Other-Day Diet will change the way you think of dieting forever. Among its many benefits: It's science-tested, science-proven. Dr. Varady has conducted many scientific studies on the Every-Other-Day Diet, involving hundreds of people, with consistently positive results published in top medical journals such as the American Journal of Clinical Nutrition and Obesity. Unlike most other diets, the Every-Other-Day Diet is proven to work. It's remarkably simple-and effective. On Diet Day, you limit calories. On Feast Day, you eat anything you want and as much as you want. You alternate Diet Day and Feast Day. And you lose weight, steadily and reliably. There's no constant deprivation. The Every-Other-Day Diet doesn't involve day after day of dietary deprivation--because you can still indulge every-other day. It's easy to keep the weight off. With other diets, you lose weight only to regain it, the frustrating fate of most dieters. But The Every-Other-Day Diet includes the Every-Other-Day Success Plan--an approach to weight maintenance proven to work in a study sponsored by the National Institutes of Health. This book offers all of the research, strategies, tips, and tools you need to believe in the Every-Other-Day Diet and easily implement it in your life. It also includes more than 80 quick and delicious recipes for Diet Day, as well as a list of tasty prepared foods that make meals as easy as 1-2-3. The Every-Other-Day Diet is perfect for anyone who wants to shed pounds and feel great, without hunger and defeat.

[Creating & Sustaining Civility in Nursing Education, 2nd Ed.](#) Elsevier Health Sciences

DIVIDIVCan Maddie follow her heart this Valentine's Day?/divDIV Far Hills Junior High is having its Valentine's dance, and Valentine's Day fever has taken over the seventh grade! Madison can't stop thinking about what to wear and whether she'll go to the dance with a date. Her two

BFFs seem to have this dance thing all wrapped up—they know exactly whom they're going with. Madison's crush, Hart, is giving her mixed signals and an anonymous secret admirer is sending her emails and putting sweet notes in her locker. Could her admirer be Hart, as she secretly hopes? When her good friend Drew asks her to the dance, Madison panics. There is so much Maddie doesn't know about boys, Valentine's Day, secret admirers, and everything in between. Why can't the signs be easier to read?/div/div *Immigrant Among Thorns* Cornell University Press

"This book should provide graduate nursing students with the knowledge to evaluate research evidence and use it in practice. With the increasing focus on EBP, this book should serve as a useful resource." Score: 100, 5 stars.--Doody's "This book would be useful for both graduate nursing students and practicing nurses."--Doody's Medical Reviews The second edition of this award-winning reference on formulating, achieving, and sustaining evidence-based practice (EBP) through clinical research updates all prior content and includes two new chapters on establishing and sustaining an evidence-based practice and environment, and how a research question drives the selection of research design, measurement, and analysis. Also featured are cutting-edge discussions of translational science and interprofessional research plus the contributions of several new authors. Designed for use by graduate students, clinical administrators, and managers and in DNP programs and in-service education, the text offers practical methods to translate evidence into practice by effectively using and appraising clinical studies. It presents research concepts in a clear, conversational tone and addresses the most current knowledge about how nurses can learn to formulate and achieve EBP as clinicians. From a single study to a meta-analysis, EBP concepts related to patient care are integrated throughout. Clinically relevant examples present ways students and staff can apply knowledge to daily clinical practice through the development, implementation, and evaluation of clinical protocols. Text boxes and web references reinforce information. Taken together, the content of the Second Edition will help the nursing profession in its move toward the forefront of institutional management, research, policy

decisions, and ethical considerationsóall to enhance safe patient care and health. The book also includes interactive PDF with fill-in, reusable templates, and is available in enhanced eBook format that includes audio/video Q & A. New to the Second Edition: Presents new content on translational science and inter-professional research. Updates all content from the first edition. Includes two new chapters on establishing and sustaining EBT and how a research question drives the selection of a research design, measurement and analysis. Presents the contributions of several new authors. Features psychosocial and physical data collection and analysis methods. Includes guidelines on evaluating research articles, including ethical components. Suggests strategies for establishing and sustaining an organizational evidence-based practice. Presents primary ways of evaluating cost as a dimension of evidence-based practice. Offers appendices with evidence-based practice activities and protocols, and a resource list of relevant websites. Features interactive PDF with fill-in, reusable templates. Available as enhanced eBook that includes audio/video Q & A **Health Systems Science E-Book** Alexandria Publishing Group Don Cherry has become a broadcasting legend, garnering millions of fans around the world with his "Coach's Corner" segment on Hockey Night in Canada. For over a decade, Cherry also hosted the TV show Grapevine, which brought viewers up close and personal with the biggest names in sports. Don was the interviewer and his son, Tim, produced the show. And no one in the sports world, from hockey players to boxers to curlers to umpires, turned down an invitation to appear on it. It was on that show that Don has some of his fondest memories from his many years in the biz, and, at last, in *Don Cherry's Sports Heroes*, he gives us behind-the-scenes access to some of his most fascinating and revealing interviews with the all-time greats. Don has his signature candidness and sizzling humour in these interviews and stories. In these pages you'll find epic stories about hockey greats Maurice "Rocket" Richard, Wayne Gretzky, Bobby Orr and Gordie Howe, to name a few, and since Grapevine TV was the place to be in the sports world, you can revel in some unforgettable stories on players in other fields, too. Don Cherry shares with the world tales that only a true insider could know. You won't be disappointed.
