Particularly valuable for Ronda's inclusion of pertinent background information about the various tribes and for his ethnological analysis. An appendix also places the Sacagawea myth in its proper perspective. Gracefully written, the book bridges the

gap between academic and general audiences. OCo"Choice""

The Araweté are one of the few Amazonian peoples who have maintained their cultural integrity in the face of the destructive forces of European imperialism. In this landmark study, anthropologist Eduardo Viveiros de Castro explains this phenomenon in terms of Araweté social cosmology and ritual order. His analysis of the social and religious life of the Araweté—a Tupi-Guarani people of Eastern Amazonia—focuses on their concepts of personhood, death, and

divinity. Building upon ethnographic description and interpretation, Viveiros de Castro addresses the central aspect of the Araweté's concept of divinity—consumption—showing how its cannibalistic expression differs radically from traditional representations of other Amazonian societies. He situates the Araweté in contemporary anthropology as a people whose vision of the world is complex, tragic, and dynamic, and whose society commands our attention for its extraordinary openness to exteriority and transformation. For the Araweté the person is always in transition, an outlook

expressed in the mythology of their gods, whose cannibalistic ways they imitate. From the Enemy's Point of View argues that current concepts of society as a discrete, bounded entity which maintains a difference between "interior" and "exterior" are wholly inappropriate in this and in many other Amazonian societies. [A History of Writing in Japan](#) Oxbow Books The Achuar Indians live in the remote forest reaches of the Upper Amazon and have developed sophisticated strategies of resource management. Philippe Descola, who has gathered material over several years of fieldwork, documents their rich knowledge of the environment. He explains how this technical knowledge of the increasingly threatened Amazonian ecosystems is interwoven with cosmological ideas that endow nature with the characteristics of society. Combining a symbolist approach with an ecological analysis, the book contributes a new theory of the social construction of nature. [The Letters of Symmachus](#) McGill-Queen's Press - MQUP The Religious World of Quintus Aurelius Symmachus examines the religious life of one of the last pagan senators of Rome,

dates c. 340-402, who lived in a tumultuous time during the Late Antique period of the Roman Empire, dying just a few years before the Western Empire began to break up. Symmachus could not have imagined the political reality developing so soon after his death, so he is important as a late example of the old Roman Western aristocracy, as well as one of the last pagans of Rome. He was regarded as the foremost orator of his time and was a prolific letter-writer who had correspondents in high places and throughout the Empire. He also filled the posts of Urban Prefect of Rome and Consul - and was the opponent of Bishop Ambrose of Milan during the so-called 384 CE Altar of Victory Dispute, which was one episode of many leading to the triumph of Christianity over traditional Roman polytheism. Symmachus' cache of 900 private letters and his official despatches while Urban Prefect have provided the raw material for this book. [In the Society of Nature](#) Nomos Verlagsgesellschaft Forest trees cover 30% of the earth's land surface, providing renewable fuel, wood, timber, shelter, fruits, leaves, bark, roots,

and are source of medicinal products in addition to benefits such as carbon sequestration, water shed protection, and habitat for 1/3 of terrestrial species. However, the genetic analysis and breeding of trees has lagged behind that of crop plants. Therefore, systematic conservation, sustainable improvement and pragmatic utilization of trees are global priorities. This book provides comprehensive and up to date information about tree characterization, biological understanding, and improvement through biotechnological and molecular tools. [Gender Diversity in European Sport Governance](#) U of Nebraska Press This updated second edition reference work looks at recent developments in the field internationally and in terms of new theories and practices. **Secrets of the Soil** IWGIA For a decade now, borders in Europe have been back on the political agenda. Border research has responded and is breaking new ground in thinking about and exploring borders. This book follows this development and strengthens a perspective that is interested in life realities and that focuses on everyday

cultural experiences of borders. The authors reconstruct such experiences in the context of different forms of migration and mobility as well as language contact situations and are sensitive to the freedom of the participants. In this way, they empirically identify everyday cultural usage or appropriation strategies of borders as vastly different experiences of borders. The readers of this volume will gain insights into current developments in border research and life realities in Europe where borders are (made) relevant.

Border Experiences in Europe A&C Black

This introduction to, commentary on, and translation into English of the first book of letters by Quintus Aurelius Symmachus shows the leading orator and statesman of the fourth-century Roman Senate deeply engaged in conversation with the leading men of the empire. The book highlights the influence of the late Roman aristocracy that flourished in the century after Constantine and demonstrates that it did not become powerless in the face of the bishops and the new Christian elite. Shared goals united the late Roman elites far more than religion divided them,

helping explain the relatively nonviolent and gradual conversion of the western Roman aristocracy. One hundred and seven letters crafted to match the recipient's personality, status, and interest discuss literature, religion, politics, and social life. They provide a unique window into the private lives of Rome's leaders, pagan and Christian, in late antiquity.

Leopardi, poet and philosopher, explores in humorous but savage dialogue the power of fashion and its strange irrationality. He also imagines conversations between Hercules and Atlas, Nature and an Icelander, and the Earth and the Moon, as well as producing a simple essay praising the humble bird. GREAT IDEAS. Throughout history, some books have changed the world. They have transformed the way we see ourselves -

and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are.

A former Japanese officer's account of his experience as a fugitive in the years following World War II. Tsuji was an ardent Japanese nationalist and opponent of the

U.S. He had planned the successful Japanese invasion of Malaya as well as the later campaign against Guadalcanal. After the Japanese defeat, he went into hiding in Thailand, assuming the guise of a Buddhist monk. From there he made his way to China, where he was aided by the Chinese Nationalists and considered an intelligence asset. He remained in China from 1945-1948, during which time some of his colleagues were tried and executed at the Tokyo War Crimes Tribunal. He returned to Japan in 1949 and wrote about his war experiences. He was elected to the Diet in 1952 and re elected twice. In 1961 he went missing in Laos and was declared dead in 1968.

Gender equality is one of the founding democratic principles of the EU. However, recent studies of the Federation of Olympic Sports in Europe have shown that women occupy only fourteen percent of decision-making positions in sport organizations. This book presents a

comprehensive and comparative study of how various regions and countries of Europe have addressed this lack of gender diversity, discussing which strategies have brought about change and to what extent these changes have been successful. With contributions from leading sport sociologists, covering countries such as Germany, Hungary, Norway, Poland, Spain, Turkey and the UK, it provides a foundation for future policymaking, methodological analyses and theoretical developments that can result in sustainable gender equality in European sport governance. Gender Diversity in European Sport Governance is important reading for scholars and students in the fields of sociology of sport, sport management, sociology, gender studies and studies of organization, management and leadership. It is also a valuable resource for policy makers in the EU, as well as national sport organizations and activists.

Urban Rituals in Sacred Landscapes in Hellenistic Asia Minor Haynes Publishing UK

From generation to generation, people experience their landscapes differently.

Humans depend on their natural environment: it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities (such as droughts, famines, floods and landslides) need to be appeased. We presume that, in many societies, lakes, rivers, rocks, mountains, caves and groves were considered sacred. Individual sites and entire landscapes are often associated with divine actions, mythical heroes and etiological myths. Throughout human history, people have also felt the need to monumentalize their sacred landscape. But this is where the similarities end as different societies had very different understandings, beliefs and practices. The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi-disciplinary approach. More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east. They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it. We see the role of performance, ritual, orality,

textuality and memory in people's sacred landscapes. A diachronic view allows us to study how landscapes were 'rewritten', adapted and redefined in the course of time to suit new cultural, political and religious understandings, not to mention the impact of urbanism on people's understandings. A key question is how was the landscape manipulated, transformed and monumentalized - especially the colossal investments in monumental architecture we see in certain socio-historic contexts or the creation of an alternative humanmade, seemingly 'non-natural' landscape, with perfectly astronomically aligned buildings that define a cosmological order? *Sacred Landscapes* therefore aims to analyze the complex links between landscape, 'religiosity' and society, developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic, holistic, contextual and historical perspective.

This book deals chronologically with the history of writing in Japan, a subject which spans a period of 2,000 years, beginning with the transmission of writing from China

in about the first or second century AD, and concluding with the use of written Japanese with computers. Topics dealt with include the adoption of Chinese writing and its subsequent adaptation in Japan, forms of writing employed in works such as the *Kojiki* and *Man'yōshū*, development of the kana syllabaries, evolution of mixed character-kana orthography, historical kana usage, the rise of literacy during the Edo period, and the main changes that have taken place in written Japanese in the modern period (ca. 1868 onwards). This is the first full-length work in a European language to provide the Western reader with an overall account of the subject concerned, based on extensive examination of both primary and secondary materials.

In Urban Rituals in Sacred Landscapes in Hellenistic Asia Minor, Christina G.

Williamson examines the phenomenon of monumental sanctuaries in the countryside of Asia Minor that accompanied the second rise of the Greek city-state in the Hellenistic period. Moving beyond monolithic categories, Williamson

provides a transdisciplinary frame of analysis that takes into account the complex local histories, landscapes, material culture, and social and political dynamics of such shrines in their transition

towards becoming prestigious civic sanctuaries. This frame of analysis is applied to four case studies: the sanctuaries of Zeus Labraundos, Sinuri, Hekate at Lagina, and Zeus Panamaros. All

in Karia, these well-documented shrines offer valuable insights for understanding religious strategies adopted by emerging cities as they sought to establish their position in the expanding world.
